

Module 17 – Financial & Managerial Accounting for MBAs, 4th Edition
by Easton, Halsey, McAnally, Hartgraves, and Morse

Practice Quiz

1. These organizations usually have a high percent of their total assets invested in inventory:
- a. Merchandising and manufacturing organizations
 - b. Service and merchandising organizations
 - c. Merchandising organizations
 - d. Service organizations

2. Direct materials, direct labor, and factory overhead are:
- a. Period costs
 - b. Conversion costs
 - c. Assigned to the cost of goods sold as production takes place
 - d. Product costs

3. Jared Company's formula for annual manufacturing overhead is:

$$Y = \$150,000 + \$8X, \text{ where } x \text{ is direct labor hours}$$

The predicted activity for 2016 is 40,000 direct labor hours and the actual activity for January of 2016 was 5,000 direct labor hours. Using a predetermined overhead rate the applied January overhead is:

- a. \$ 40,000
 - b. \$ 58,750
 - c. \$190,000
 - d. \$208,750
4. This is the document used to accumulate the costs for a specific job, whether products are manufactured in single units or are produced in batches of identical units.
- a. Cost of production report
 - b. Production order
 - c. Bill of materials
 - d. Job cost sheet

5. Following is information from the records of the Winnipeg Company for August:

Direct materials	\$ 60,000
Sales	450,000
Administrative and sales salaries	40,000
Direct labor	95,000
Production supervisors' salaries	10,000
Plant utilities	4,500
Office utilities	1,500
Plant depreciation	12,000
Office rent	2,000

Additional information:

- There were no beginning or ending inventories of Work-in-Process or Finished Goods
- Calgary does not use a predetermined overhead rate.

The August cost of goods sold is:

- a. \$171,500
- b. \$181,500
- c. \$225,000
- d. \$675,000

6. Presented is selected information from Hook's September income statement and statement of cost of goods manufactured:

Cost of goods sold	\$180,000
Cost of goods manufactured	\$110,000
Finished goods inventory, September 30	\$ 30,000

Hook's finished goods inventory on September 1 was:

- a. \$80,000
- b. \$40,000
- c. \$100,000
- d. \$70,000

7. Presented is selected information from Barney's March statement of cost of goods manufactured.

Predetermined overhead rate	70 percent of direct labor dollars
Direct materials	\$ 46,000
Cost of goods manufactured	\$122,500

Barney's February direct labor was:

- a. \$78,200
- b. \$45,000
- c. \$76,500
- d. \$85,750

8. The beginning inventory consisted of 20,000 units, 40 percent complete and the ending inventory consisted of 12,000 units, 50 percent complete. There were 30,000 units started during the period. Determine the equivalent units of conversion in process.

- a. 32,000
- b. 38,000
- c. 20,000
- d. 44,000

9. Presented is selected information from Macro Group cost of production report:

Cost per equivalent unit in process	\$15
Units completed	45,000
Total costs in process	\$765,000
Equivalent units of materials in ending inventory	7,000
Cost per equivalent unit of materials	\$10

The ending inventory of work-in-process is complete as to materials. The cost of conversion in the ending inventory is:

- a. \$20,000
- b. \$38,000
- c. \$70,000
- d. \$90,000
